OUR MISSION

The mission of Sustainable Engineering & Education Development (SEED), in partnership with Engineers Without Borders - Georgia Tech, is to empower the greater Atlanta community by fostering academic motivation and supporting education through sustainable nutrition. We are dedicated to sharing the resources and knowledge that students at this institution are fortunate to have, in order to cultivate hope and passion for learning in younger generations. Additionally, we aim to combat food insecurity by providing the community with access to fresh produce that fuels both their bodies and minds.

To accomplish this, our project takes a three-pronged approach: designing and funding the construction of a sustainable greenhouse that doubles as an outdoor classroom, implementing monthly STEM workshops for early engineering exposure and hands-on curriculum, and utilizing the greenhouse to provide fresh produce to students, parents, and community members. This will create lasting change by developing a comprehensive, self-sustaining solution that makes a significant step toward ending food insecurity and bridging educational gaps for the next generation of leaders and problem-solvers.

MEET THE TEAM

The students behind SEED-ATL

Technical

Our technical team uses engineering principles to tackle the challenge of designing and building a greenhouse at Deerwood Academy.

Community Outreach

Our community outreach team plans workshops for the students at Deerwood Academy that integrate with their STEM curriculum by collaborating with the amazing educators at Deerwood, organizing student volunteers, and planning the content of the workshop.

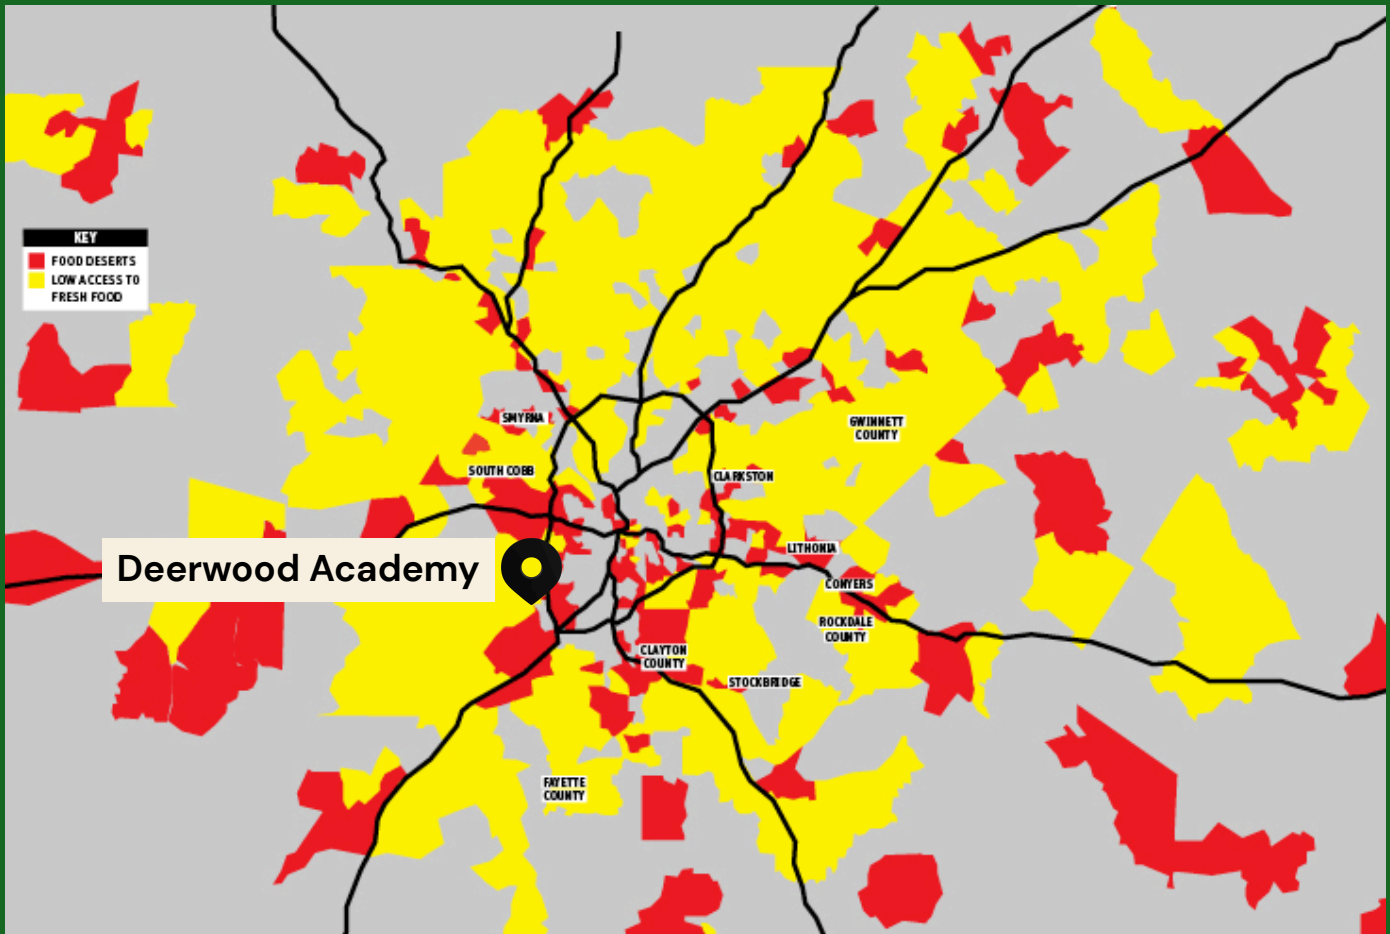

Networking

Our networking team manages the online presence of our organization and is in charge of raising funds for the construction of our greenhouse.

Our Mentors

Our mentors — Julie Wade, Caroline Stanton, CW Webb, and Danny Smyl — aid us in design, construction planning, non-profit logistics, and engineering consulting

DEERWOOD ACADEMY

Deerwood Academy is in Southwest Atlanta, located in a food desert. This means that the community lacks access to healthy, fresh foods and has limited grocery stores with sparse options. Deerwood Academy is a Title I School, meaning it is both underperforming academically and located in a low-income area. Specifically, 73% of students are economically disadvantaged, and over 75% are *not* proficient in mathematics based on state testing. As SEED, we hope that our greenhouse addresses food insecurity for elementary schoolers and community members alike and that our STEM workshops help facilitate a passion for learning and improvements on state testing.

Donor Levels

\$100-\$10,000

\$10,000

FOREST DONOR

\$5,000

GROVE DONOR

\$1,500

SAPLING DONOR

\$750

SPROUT DONOR

\$250

SEEDLING DONOR

Sponsorship Benefits

Forest Package

Greenhouse Named after sponsor with Logo Featured

Invitation to Speak at the Ribbon Cutting with Press

Logo Featured on Website and Materials

Instagram and LinkedIn Post

Large Framed Photo of Greenhouse with Plaque, signed by Students

\$10,000

Grove Package

Outdoor Raised Bed Named for Sponsor with Logo on Greenhouse

Thanks Given at the Ribbon Cutting with Press and Invitation to Attend

Logo Featured on Website and Materials

Instagram and LinkedIn Post

Small Framed Photo of Greenhouse with Plaque

\$5,000

Sapling Package

Indoor Gardening Bed or Shelf
Named for Company with Logo

Name/Logo on Website
and Materials

Invitation to Ribbon Cutting

\$1,500

Sprout Package

Company Name and Logo on the
Inside of the Greenhouse

Name/Logo on Website

Invitation to Ribbon Cutting

\$750

Seedling Package

\$250

Name/Logo on Website

Invitation to Ribbon Cutting

Thank you for your consideration!
